Jackson brings campaign to Dubuque

by John Kemp

Jesse Jackson brought his presidential campaign to Dubuque Monday, in an effort to swing undecided voters towards his direction.

Speaking at Blades Chapel on the University of Dubuque campus, Jackson told the enthusiastic crowd of students, faculty and supporters that "we can win."

Jackson said his campaign has far more substance than any of the other candidates, both Democratic and Republican. "I'm leading the other candidates in another direction. I didn't inherit the right to vote. I grew up challenging the government and have done more to make America a better place to live than anyone running."

Jackson believes the American

public wants a change and he is ready to give them that change. "My campaign is not just politics with a small 'p'. It's a campaign for transforming American politics and changing the course of the nation. We are not taking opinion polls, but molding opinions."

Jackson said that America's urban workers and farmers must find common ground and work towards building a solid relationship. "Urban workers on their best day cannot make it alone. That's why I'm a quiltman building a quilt - a thing of power and beauty, like a common cord, that binds us all."

Jackson went on to say that he will be there whenever America's workers need him. "I will be with you at the plant gate, the farm auctions and the campaign headquarters. But next year, under the Jackson Administration, there will be no plant closings or farm auctions."

Jackson managed to address issues that are relevant and crucial for anyone running for president. One of his key concerns is the belief that the foreign policy in the United States is inconsistent and fails to promote courage.

"The support of national laws and human rights are just two things that should be included in the foreign policy. We can't have an international law for the Persian Gulf that

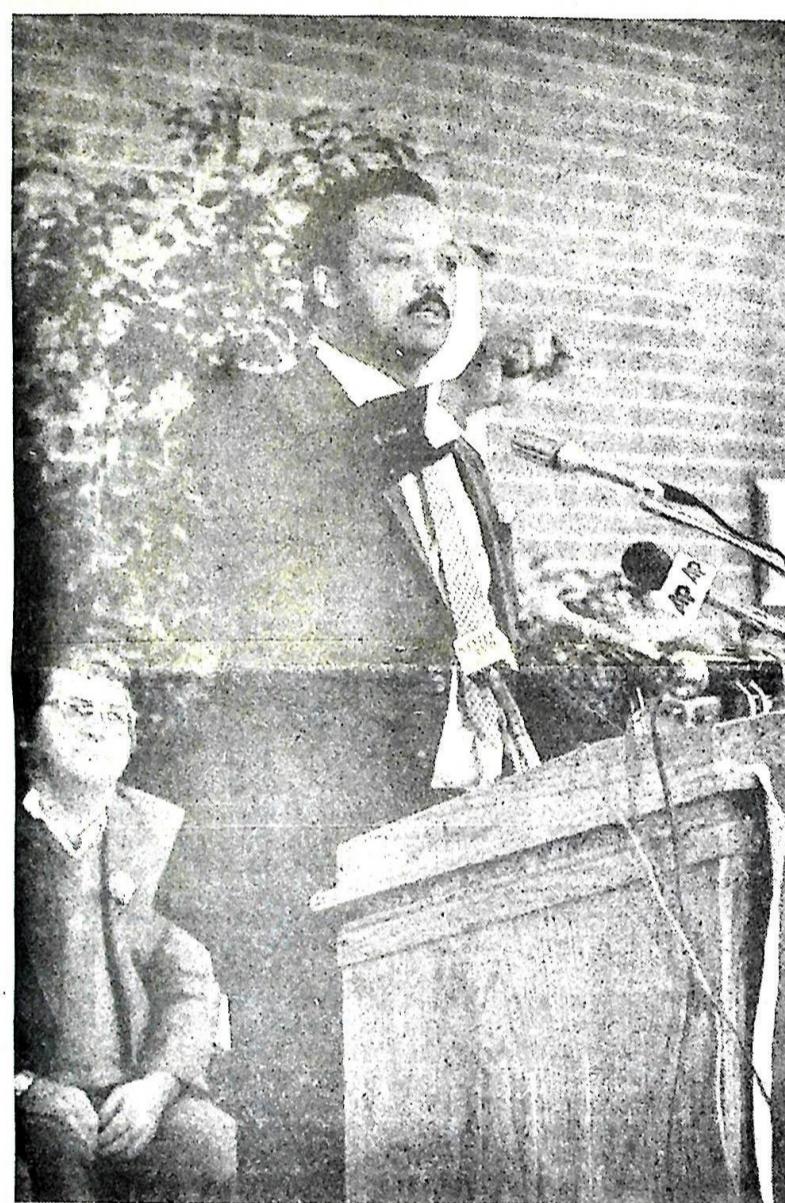

doesn't apply to Nicaragua as well. The multinational foreign policy must be consistent. We must have courage of our convictions."

After explaining his position on foreign policy, Jackson turned to the crowd and asked those who had ever attended a caucus to stand up. When they stood up, Jackson smiled and said "they'll be glad to see you at the caucuses."

Jackson told the crowd the word caucus means "get together." "A caucus is nothing more than a get together. On Monday, Feb. 8, we're going to have a get together."

"They (the precincts) will have some signs around with confusing names on them — referring to the other presidential candidates. But you'll recognize the name of your next president."

While the polls have him in a solid position, right behind Massachusetts Governor Michael Dukakis, Illinois Senator Paul Simon and Missouri Representative Richard Gephardt, Jackson believes, "We can win if we put our focus on the right pride."

Program to benefit children of alcoholics

by Ann Steer

Jean Tiffany, director of the Personal Growth Center has found one area that is lacking in Clarke's community. What concerns Tiffany is the students' and staff's emotional well-being, particularly those Adult Children of Alcoholics (ACOA's). Tiffany has decided that a support group would be very beneficial. "Presently, there is not a lot of help on campus for ACOA's."

Tiffany came to Clarke in October of this year. Her training includes counseling, student development, substance abuse and dealing with adolescents. She is modeling the group after a program implemented by the University of Iowa. The program began three to four years ago and has been a big success. It has been used widely across the state. The groups, however, have been lacking in male attendance. Tiffany is hoping to get more men involved in the group. "Women tend to seek help for emotional trouble more than men."

Monica Ryan, a senior, will help

Tiffany direct the group. The first meeting will be held Feb. 15. Only six to eight people will be allowed to attend and must be screened by Tiffany prior to the first meeting. "Trust is a big issue," said Tiffany. "Secrecy is big in alcoholic families. We want to make sure that people are right for the group, since everything is strictly confidential. No records are kept."

The program is not at all connected with Alcoholics Anonymous. The support group has been adapted to meet the needs of the Clarke community. The program directors have recognized the fact that traditional treatment and therapy for alcoholics has not been successful because the whole family is affected by the disease. The emotional scars of children and co-dependents must be addressed. Without the issues addressed, ACOA's are four times as likely to become alcoholics as non-ACOA's.

Many ACOA's hold back their feelings, and try to forget their traumatic experiences. They feel guilty, lone-

ly, ashamed, angry and isolated. Tiffany referred to shame-based families of abuse where secrets are kept within the family. The support group will work to help ACOA's trust one another enough to work through those secrets.

The rationale of the group at Clarke is to educate members about family dynamics. ACOA's played roles and lived by certain rules in a home where alcoholism prevailed. The program will help members to identify behaviors they learned that may be causing them problems in the adult world.

There are certain roles that ACOA's can identify with such as being the responsible one or the hero. This type of person may be very organized, have good study habits and grades, yet he or she can't have fun or relax. They may fear their own feelings.

Another family role that may be adopted by an ACOA is that of a scapegoat. The scapegoat may find that he or she can't compete with the hero so they give up and get

negative attention. The support group will help members to recognize roles such as these and help them to cope in their daily lives.

Because the process of recovery for an ACOA is slow, the group will meet several times. The group's structure will be a safe environment

built on trust. "We live in a dynamic, changing society, even here at Clarke," Tiffany added, "If the group can help people to learn coping skills, and can help one another, then it will be successful." Tiffany may be contacted in the Personal Growth Center for a consultation.

Students participate in CSA event

by Michael Cissne

"Quest for the Brick," a CSA tradition was held in the PAC Monday, Jan. 25. This activity gives each class a chance to compete against one another with an olympic atmosphere, working towards the ultimate prize, a brick. The 1988 "Quest for the Brick" competition was won by the senior class.

This brick is more of an honorary title gift than an actual prized possession with any value or prestige. Nonetheless, each class puts out 200 percent as they compete through various games and activities.

In each event, first place received a score of 25 points, second received 15 and third 10. After eight events, the seniors had a final score of 125, which put them in first. The junior team, trying for a third win after a two-year long winning streak, placed second with a score of 120. Sophomores finished third with a score of 100 and freshmen finished with a score of 65.

The members of each team were:

Freshmen: Chris Fries, Tricia Gloeckler, Bev Mayer, Kara Plemel, Aimee Radke and Jason Volkoff.

Sophomores: Bryan Brueck, Jenny Harrington, Anita Klein, Kevin Madden and Molly Menke.

Juniors: Chris Herber, Blake

Scranton, Mike Schneck, Dave Schrader, Ben Tarsitano and Mike Vittetoe.

Seniors: Bernadette Kennedy, Chrissie Klingsmith, Tim Martinek, Dave Scharf and Brian Ward.

A ninth and final event of the competition that could have changed the outcome of the finishes had to be cancelled. The tug-of-war event was scratched from the competition after the rope snapped. The contestants in the event had to wear socks, but no shoes.

The first event was called the Life Saver exchange and was won by the sophomore class. All four teams needed five players and each player had to hold a toothpick with a Life Saver on it in his or her mouth. From this point, the first player tries to transfer the Life Saver to the next person's toothpick without any help.

The next event was the egg rolling event. One player from each team had to roll a hard boiled egg down the floor of the PAC to a designated finish line. The players could not use their hands in this event.

Chris Herber, representing the junior class, won the egg rolling event. Herber used an effective technique to master this contest. When the whistle blew, Herber thrusted his head forward, forcing the egg to roll quickly to the finish

line.

The third event was won by the freshman pair, Jason Volkoff and Chris Fries. One player from each team tossed a hard boiled egg to a second player. Then, that second player would move backwards and toss the egg back to his/her partner. This continued until the egg fell to the ground.

Mike Vittetoe who is a physical education minor and was on the Clarke golf team used his athletic skills to conquer the mini-putt event. "Everyone else had over-shot the hole and the greens were fast, so my main concern was to hit the ball short," said Vittetoe.

At this point, all the classes had won an event except the senior class. The juniors had the lead with 70 points, sophomores and seniors were tied with 50 points and the freshmen had 40.

It was not until the fifth round of competition that the senior class won an event, which was a belching contest.

The sixth event took many people back to the days of diapers and milk bottles. This event was called the

pop sucking event. Pop was poured into baby bottles and contestants from each class raced to the finish.

Molly Menke, of the sophomore class, won the event. She won the event in a record time of 53:23. Senior Tim Martinek came in second with a time of 1:08:33. Freshman, Tricia Gloeckler finished third with a time of 1:09:57. Junior, Ben Tarsitano was unable to finish his baby bottle of pop.

With Martinek's help the senior class took the lead with a score of 90.

The seventh event was unofficially called the "Dizzy Lizzy Spin." This game sent people flying in all directions. All four classes had teams of five and the first person in each group had to run to the half court line of the PAC, bend over, rest their head on a baseball bat and move around in a circle ten times while keeping the bat on the ground. After the tenth rotation, the player was supposed to run back to the start and let the next player go. However, after spinning around in a circle ten times, most people had much difficulty finding their way back. People curved

right and left, tripped and stumbled, occasionally fell flat on their face, but nobody was able to run back to the starting place in a completely straight line.

"I was really confident, but then my feet went straight and my body went sideways," said Volkoff.

The eighth event, which was the last event, involved fishing a spoon in and out of each other's clothing. The first person on the team slipped the spoon that was attached to a string through his or her shirt sleeve, down the shirt and out the pant leg. This continued on to the next person in line who had to repeat the process all over again. The first team who completed the event was awarded 25 points. The juniors took first, the freshmen took second and seniors claimed third. The sophomore class got themselves tangled up with the string and took last.

After this event, the seniors had won the "Quest for the Brick" competition. The seniors had a consistent trend as they finished in every round. The juniors received the most first place finishes, but were unable to defend their title.

Campus parking poses problems for students during the winter months

by Patrick Bradley

Cooperation and attention to the Clarke parking regulations and snow removal policies will prove to be worth everyone's time if observed regularly. The parking regulations have been posted since Sept. 1 and the winter of 1987-88 has been keeping the physical plant department on its toes.

In warmer weather, the parking at Clarke is not too crowded, but when the snow begins to build up, the space available seems to shrink. Clarke offers students parking in the Terence Donaghoe Hall parking lot, better known as "the pit," the Mary Frances Hall parking lot and parking on Clarke Drive all along school property.

City regulations provide that street-parking near the school on Clarke Drive is for students, except where restricted. Autos parked longer than 24 hours on city streets will be ticketed for street storage by the Dubuque Police Department, and if not moved after 48 hours, will be towed at the owner's expense. Most students are aware that these rules are not enforced often, if at all, which sometimes makes it tempting to take advantage of the lack of enforcement.

Now this brings us to the snow removal policy. "When there is two or more inches of snowfall, we have an outside contractor who clears the parking lots," said Physical Plant Director Dave Hunt, "but our maintenance crew at Clarke does most of the cleanup throughout the winter."

Dan Schlitter, Darryl Deutmeyer, Steve Cue, Dick Schneider and Rick Allendorf are all assigned to the various entryways and steps. Salt is repeatedly put down on icy areas. "These men work all year round. They don't get breaks when the students do," said Hunt.

The snow removal equipment consists of three tractor-plows and a snowblower. Dan Schlitter handles the big equipment and clears the service areas to Mary Ben, Mary Jo, the new building and the computer center lot. Steve Cue clears the Clarke Drive sidewalks on both

sides. If it snows on the weekend, these men must work those days. The snowblower is used in front of the Atrium to prevent damaging the new pebbled entryway.

"We have salt buckets and shovels at most campus entrances for students and faculty to use in case their car gets stuck," said Hunt, "but I would like to remind anyone who uses the shovels to please return them."

Hunt said one of the problems to consider is the time and amount of snow accumulation. "When students walk on the snow before we have a chance to remove it, this packs it down and makes the job more difficult," said Hunt. "Another problem which must be considered is the amount of salt we put down. If it gets dragged into the school, then we have another kind of mess."

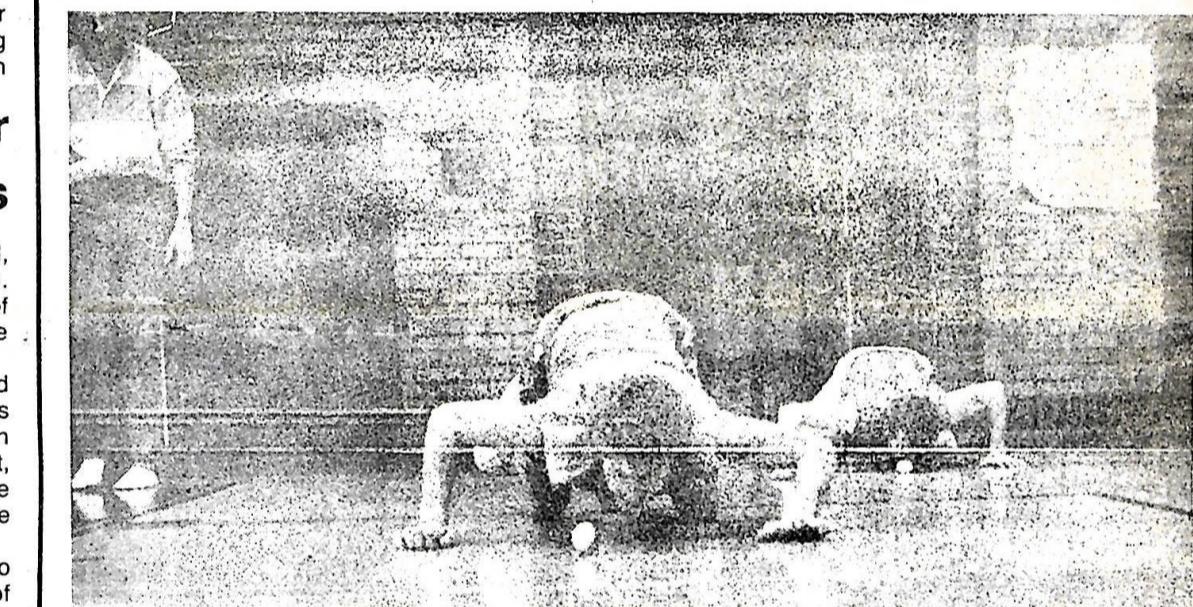

The plowing of Clarke Drive is the city's responsibility and the streets were cleared during Christmas break. Sometimes the city will post signs warning people to move their cars during certain hours; other times they will notify Hunt directly.

Several students voiced their opinions about the problems of snow removal. Greg Jones and Sara Merkes think the snow should be removed more promptly. "If they would take care of it the day it snows, it wouldn't become such a big problem," said Merkes.

Aimee Radke, Marc Tucker and Jean Tucker all think there should be designated areas to park while snow is being removed from certain other areas.

"My car was stuck in front of Mary Jo all during break," said Tim Martinek. Mike Cissne thinks the parking lots are too small when the snow is not completely removed. "Also, the steep inclines in the pit make a very dangerous situation. I'm surprised more cars have not slid into each other," he said.

Al Kramer's approach is a little different. "I think we should have valet parking because we pay thousands of dollars to come to school here. Also I think that when we consolidate, we should be provided with limousine service to take us from Clarke to Loras."

Virgil selected 'Athlete of the Week'

by Vanessa Van Fleet

A player that has potential in defense, offense, rebounding and scoring is what any coach would want on his team. The ability to assist, steal and assume team leadership would be even better. Head basketball coach Bill Kuchler gets all these qualities from athlete of the week, Tracy Virgil.

Virgil, a senior business administration major from Chicago, leads the team this week in overall rebounding and team assists. He is also second leading scorer.

On Jan. 9, Virgil, a starting guard for the Crusaders, set a new record in team assists against the Upper Iowa Peacocks. Virgil had 14 assists, which was three better than his previous record of 11 set during the 1986-87 basketball season.

Being a veteran Crusader, Virgil has set some pretty high goals for himself. First, he would like to lead the team in assists and steals. Secondly, Virgil would like to bring good quality leadership to the team.

"Tracy has already accomplished his goal as being team leader," said

Kuchler. "That is one reason why we chose Virgil. He has shown great leadership and team comaraderie both on the court and off."

Virgil admitted that it was very hard for him in the beginning to stand out as a good leader. "This year things have changed and it took me a little longer to adjust to the new ways. I feel that I've handled it well in the past and I'm coming on even stronger now."

As a senior, Virgil has one last major goal for the rest of the season. "I want to play hard and be the best that I can, no matter what will happen. I've never been on a team quite like this one. We're like a family and I want to do my best for them," said Virgil.

Last week, Virgil was one of the key reasons for the victories over Moody Bible Institute and Edgewood College. Currently, Virgil is averaging over 16.2 points, four team assists and seven rebounds per game. He is also a 67 percent shooter from the free line. With Virgil's quickness and determination, he has become very hard to stop.

As teammate Lee Kolker said, "When Tracy plays well, we all play well."

When Virgil was asked how the team felt as a whole, he said, "Most of us are kind of frustrated. We keep

doing everything the coaches want us to do, but we still keep coming up short in the end. We're playing hard and giving it our all, but we just can't put it together."

"One aspect of our team's efforts this year that people don't realize is that we lost 13 out of 20 games by only ten points or less. To compare those statistics to the last two years, where we lost 11 out of 57 games by ten points or less, we've improved tremendously," said Virgil.

"This year our team has really come together. It's the first time in three years I feel we're really playing together instead of as individuals. We're thinking as a team."

Virgil believes if they keep playing as a team, they will improve their record and do well in the NLCAA district play-offs. The two teams Clarke will face are Edgewood College and Trinity College. The outlook for the men Crusaders seems very good.

Virgil also credits Crusader fans as a major part of team support. "The fans have helped us out even if they don't realize it. I love them."

When Virgil wants to get away, he can usually be found going out with his friends or in his room listening to jazz music. Virgil can also be found in the athletic office or in the weight room where he works for Bill Kuchler.
